

Customer Journey Map

Documentation & Fully Completed Practical Framework

Item	Completed scope
Scenario	Customer purchasing a product online
Stages	Awareness → Consideration → Purchase / Conversion → Experience / Use → Loyalty / Advocacy
Scope	Generic worked example; validate with real customer evidence before operational use.
Version	September 2026

Source basis: The uploaded document uses a generic online-purchase scenario. The details below complete its tables without claiming research findings.

1. Completed Customer Journey Map

	Goal	Actions	Touchpoints	Thoughts / questions	Emotion	Pain points	Opportunities	Metrics
	Recognize a relevant solution.	Sees social post; searches; notices content.	Social media; search; content; referrals.	Is this relevant? What problem does it solve?	Curious	Value may be unclear.	Clarify value proposition; simple next step.	Reach; qualified brand search; content engagement.
on	Understand options and trust the offer.	Visits site; reads information; checks reviews; compares.	Website; product pages; reviews; FAQs; demos.	Can I trust this? How does it compare?	Interested → uncertain	Missing proof; unanswered questions.	Improve proof, FAQs, comparisons, reassurance.	Product engagement; requests; comparison; usage; lead quality.
	Complete purchase confidently.	Adds to cart; enters details; pays; confirms.	Cart; checkout; payment; confirmation; onboarding.	Will payment work? What happens next?	Excited → cautious	Long forms; payment uncertainty.	Reduce form fields; show reassurance; clarify next steps.	Conversion; checkout completion; abandoned time to purchase.
/ Use	Receive and successfully use product.	Receives; starts use; follows instructions; seeks help.	Delivery; product/app; notifications; support.	Did it arrive correctly? Does it solve my need?	Satisfied or frustrated	Delivery/setup problems; unclear instructions.	Improve onboarding, instructions, support access.	Task success; delivery success; product support contacts.
Advocacy	Decide whether to return or recommend.	Reviews; reorders; support; feedback; referrals.	Email; support; loyalty; feedback; referrals.	Would I choose this again? Recommend it?	Delighted or neutral	Weak follow-up; unresolved issues.	Create retention, feedback, referral moments.	Repeat purchases; satisfaction; referral CLV.

2. Journey Framework Layers

Layer	Completed content
Persona	Generic online shopper needing a clear solution, trustworthy information, simple purchase, and successful use.
Goal	The outcome the customer is trying to achieve at each stage.
Actions	Observable steps from discovery through repeat purchase or recommendation.
Touchpoints	Where and how the customer interacts with the organization.
Thoughts & questions	Questions and uncertainty that can influence progression.
Emotions	Illustrative emotional states; validate through research.
Pain points	Potential friction, uncertainty, delay, or dissatisfaction.
Opportunities	Changes that can make the experience easier or better.
Metrics	Measures used to determine whether the experience improved.

3. Opportunity Backlog

Opportunity	Stage	Impact	Effort	Evidence status	Next action
Clarify value proposition	Awareness	High	Low–medium	Validate	Test messaging with customers and engagement data.
Improve proof, FAQs, comparison	Consideration	High	Medium	Validate	Identify unanswered questions and test revised content.
Reduce checkout friction	Purchase	High	Medium	Partly measurable	Review abandonment and test shorter forms/reassurance.
Improve onboarding and instructions	Experience	High	Medium	Validate	Observe first-use tasks and revise instructions.
Create retention/referral moments	Loyalty	Medium	Medium	Validate	Test useful follow-up, feedback, and referral prompts.

4. Research & Metrics Plan

Method	Use	Output
Customer interviews	Motivations, expectations, language, frustrations.	Themes, needs, expectations, pain points.
Surveys	Quantify satisfaction, preferences, recurring problems.	Frequencies, ratings, segment patterns.
Usability testing	Observe task completion and interaction friction.	Task success, errors, time, friction.
Analytics	Find drop-offs, conversion patterns, repeat behavior.	Funnels, conversion, abandonment, repeat behavior.
Support data	Identify recurring questions, complaints, failure points.	Issue categories and resolution patterns.
Reviews & social feedback	Understand unsolicited reactions.	Recurring themes and customer language.

Stage	Metrics
Awareness	Reach; qualified traffic; brand search; content engagement.
Consideration	Product-page engagement; demo requests; comparison usage; lead quality.
Purchase	Conversion rate; checkout completion; abandonment; time to purchase.
Experience	Task success; delivery success; product usage; support contacts.
Loyalty	Repeat purchase; retention; satisfaction; referral rate; customer lifetime value.

5. Final Checklist

Question	Completed answer	Status
Who is the customer?	Generic online shopper in the worked example; define and validate a specific persona for a real project.	Complete
What are they trying to accomplish?	Discover a relevant solution, evaluate it, purchase confidently, use it successfully, then decide whether to return or recommend.	Complete
What steps do they take?	Awareness → Consideration → Purchase / Conversion → Experience / Use → Loyalty / Advocacy.	Complete
Where do they interact with us?	Social/search/content; website/reviews/FAQs; checkout/payment; delivery/product/support; email/loyalty/feedback/referrals.	Complete
What do they think and feel?	Questions and illustrative emotions are documented for every stage and require validation.	Complete
Where are the biggest pain points?	Potential friction includes unclear value, insufficient proof, checkout friction, delivery/setup problems, and weak follow-up.	Complete
Which opportunities matter?	Clarify value, improve proof/comparison, reduce checkout friction, improve onboarding, and create retention/referral moments.	Complete
How will success be measured?	Stage-specific metrics cover acquisition, consideration, conversion, use, satisfaction, retention, and referrals.	Complete
Who owns the next action?	Actual organizational owners should be assigned during implementation; suggested ownership can follow the functional areas in the source framework.	Complete
