

Code-Layout, Readability and Reusability

Date	04-10-2026
Team ID	SWUID2026316988
Project Name	FARM MANAGEMENT SYSTEM
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Salesforce components and configuration steps are organized consistently.
2	Proper File Structure	Files and folders are logically organized	Yes	Farm, Crop, Farmer and Buyer components are logically separated.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Names such as Farm, Crop, Farmer, Buyer and related fields are descriptive.
4	Function / Method Names	Functions are descriptively named	Yes	Flows, validation rules, reports and dashboards use descriptive purposes/names.
5	Code Comments	Inline and block comments explain logic	Partial	The project documents configuration steps; source-code comments are limited.
6	Modular Design	Code is split into reusable functions/modules	Yes	Objects, relationships, validation rules, flows, reports and dashboards are modular.
7	No Redundant Code	Duplicate or unused code is removed	Yes	The project uses separate objects and reusable configurations instead of duplicate data.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Validation rules and Salesforce access controls help prevent invalid data and access.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Custom Objects: Farm, Crop, Farmer, Buyer	Salesforce	Data entry, relationships, reports and dashboards	High
2	Validation Rules & Formula Fields	Salesforce	Farm/Crop data validation and calculated values	High
3	Flows / Automation	Salesforce Flow	Crop updates and buyer notifications	Medium
4	Reports	Salesforce Reports	Farm, crop, farmer and buyer analysis	High
5	Dashboards	Salesforce Lightning	Productivity, sales and operational monitoring	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Logical Salesforce objects, relationships and configuration modules are used.
Readability	4	Descriptive object, field and component names make the configuration understandable.
Reusability	5	Custom objects, validation, flows, reports and dashboards can be reused across farm records.
Documentation / Comments	3	The project contains detailed configuration steps, but inline source-code comments are limited.
Overall Score	4	Strong declarative organization with scope for more code-level documentation.
