Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Postman (Collection Runner) against the Salesforce REST API; Salesforce Lightning UI and Reports for manual timing
Type of Testing	Load Testing (expected load) and Spike Testing (sudden peak)
Target Module / API	Farm, Crop, Farmer and Buyer objects (record create/read/update), Flows (crop updates and buyer notifications), Reports and Dashboards
Test Environment	Cloud: Salesforce org (Developer Edition / Sandbox)
Test Date	04-10-2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Create Farm and Crop records through the API / UI	10	60	All requests succeed; average response under 2 sec
2	Open Farm, Crop, Farmer and Buyer record pages and list views	25	120	Pages load within 2 sec; no errors
3	Run Farm / Crop reports and open dashboards	10	60	Reports and dashboards render within 5 sec
4	Peak load: bulk crop updates triggering flows and buyer notifications	50	120	Flows complete; error rate under 1%

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	[enter result]	[enter result]	[enter result]
2	Response Time (Max)	< 5 seconds	[enter result]	[enter result]	[enter result]
3	Throughput (Req/sec)	>= 5 req/sec	[enter result]	[enter result]	[enter result]
4	Error Rate	< 1%	[enter result]	[enter result]	[enter result]
5	CPU Utilization	< 80%	N/A	N/A	Managed by the Salesforce platform; not measurable by the customer
6	Memory Utilization	< 80%	N/A	N/A	Managed by the Salesforce platform; not measurable by the customer

Step 4: Observations & Analysis

Key Findings:

[Add what the test results showed about system performance]

Bottlenecks Identified:

[Add any bottlenecks observed during testing]

Optimization Steps Taken:

[Add any changes made to improve performance]

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

[Insert Screenshot 1 here]

[Insert Screenshot 2 here]
