

Technology Stack

Date	03 October 2026
Team ID	SWUID2026317864
Project Name	Farm Management System
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side <i>(e.g., React, Angular, HTML/CSS)</i>	Salesforce Lightning UI	User-friendly interface for accessing and managing farm, crop, farmer and buyer data.

2	Backend / Server-Side <i>(e.g., Node.js, Python/Django, Java)</i>	Salesforce Platform	Provides the application platform for managing Farm Management System operations.
3	Database / Data Storage <i>(e.g., MySQL, MongoDB, PostgreSQL)</i>	Salesforce Cloud	Provides centralized cloud storage for farm, crop, farmer and buyer data.
4	Cloud / Hosting / Deployment <i>(e.g., AWS, Azure, Heroku, Docker)</i>	Salesforce Cloud	Cloud-based infrastructure supports centralized access and scalability.
5	Version Control & CI/CD	Not specified in reference	No version control or CI/CD technology is specified in the Farm Management System reference.

	<i>(e.g., GitHub, GitLab, Jenkins)</i>		
6	Third-Party APIs / Other Tools <i>(e.g., Stripe, Twilio, Google Maps)</i>	Validation Rules; Reports & Dashboards	Validation Rules automate data validation; Reports & Dashboards support analytics and visualization.
